

Quick-tric Modular Electrical System

Pre-engineered Quick-Tric Electrical System

Our available electrical package that is completely pre-engineered. *The Quick-tric pre-engineered electrical system is designed to snap together for fast and easy installation. The connections are color-coded and safety keyed to lock together in one direction, making it virtually impossible to connect the system incorrectly.

Specifications / Benefits

- Components are 100% reusable.
- All components are U.L. listed and meet N.E.C. requirements.
- System is designed for easy add-on or relocation.
- Electrician is needed only to hookup power source to breaker box.
- System snaps together quickly and can be installed while the office is being assembled.
- Spring steel latches hold connections securely in place.
- System is 5-wire with 2-circuit capability.
- All wiring is 12 gauge with THHN insulation.
- A complete layout drawing and material list is supplied.
- **All components are wired to the modular connectors at the factory.

* **IMPORTANT NOTE:** *A few local electrical codes do not allow pre-engineered electrical components. It is extremely important that consult your local building inspector prior to ordering a modular office system from us or anyone else, to determine if any code restrictions apply.*

**** Some office manufacturers offer modular electric packages but they require the installer to wire the connectors to the electrical devices in the field. The Quick-tric system comes from the factory with all components, including the panel board, wired with the modular connectors.**
