

## Seal Tabs

At GBPSilvercote, we have the ability to apply a high quality all weather double stick tape to the tab(s) of the vapor retarder. In addition, we can apply the tape to either the front side (i.e., the exposed side), or to the back side of the tab(s). The "Standard Seal Tab" options are the most popular choices for customary metal building applications.

\*Note: All of these examples are shown with standard tabs sizes (2-3" & 1-6"). We will be happy to provide Seal Tabs for non standard sizes as well.
